Kent Brain Injury Forum (KBIF)

**KENT
BRAIN
INJURY
FORUM**

Who we are

- Umbrella organisation representing people & wide varieties of stakeholders.
- Website.
- Linked with UKABIF.
- Work closely with Headway & other charities like Neurological Alliance.
- Membership include patients & family members and carers of patients.

[The Theory of Everything \(2014\) - IMDb](#)

www.imdb.com/title/tt2980516/

Upgraded: The talking technology that allows Professor Stephen Hawking to communicate with the outside world has been upgraded to allow for a worsening of the degenerative disease he suffers from

The world renowned physicist has for the past ten years composed his sentences one letter at a time using a twitch of his cheek to stop a cursor as it moves across an on-screen keyboard.

After he painstakingly crafts his sentences one word at a time, a computer attached to his wheelchair reads them out in the distinctive metallic voice for which he is known.

EMPOWERMENT

**NO DECISION
ABOUT ME
WITHOUT ME**

Shared Decision Making

No decision about me, without me. This process of empowerment can only be realised by involving people with disability fully in their own care, with decisions made in partnership with all concerned.

Shared Decision Making is a process in which patients, when they reach a decision crossroads in their health care, can review all the treatment options available to them and participate actively with their healthcare professional in making that decision.

With current, clinical and technological information i.e assistive technology relevant to their particular condition, about all the options available to them patients are helped to work through any questions they may have, explore the options available, and take a treatment route which best suits their needs and preferences.

**TO ACHIEVE THIS, KBIF
ENCOURAGES THE DEVELOPMENT
OF NEW RELATIONSHIPS BETWEEN
PATIENTS, CARERS AND CLINICIANS
AND INDUSTRY WHERE THEY WORK
TOGETHER, IN EQUAL PARTNERSHIP,
TO MAKE DECISIONS AND AGREE A
CARE PLAN AND PACKAGE .**

IN ADDITION, WE WANT TO PUT SHARED DECISION MAKING NOT ONLY AT THE CARE LEVEL, BUT ALSO AT THE STRATEGIC AND COMMISSIONING LEVEL, WITH PATIENTS INVOLVED IN THE CO-DESIGN, CO-COMMISSIONING AND CO-PRODUCTION OF HEALTHCARE.

**WITHOUT THESE CHANGES,
WE CANNOT ACHIEVE THE
REQUIRED TRANSFORMATIONAL
CULTURE CHANGE TO SUPPORT
SHARED DECISION MAKING**

WORKING MODEL OF GOOD PRACTICE
COLLABORATION OF ACADEMICS,
CLINICIANS, MANAGERS WITH INPUT
FROM SERVICE USERS TO UNDERTAKE
HIGH QUALITY APPLIED HEALTH
RESEARCH FOCUSED ON NEEDS OF
PATIENTS AND SERVICE USERS,
SUPPORTING THE TRANSLATION OF
RESEARCH EVIDENCE INTO PRACTICE IN
HEALTH AND SOCIAL CARE.

DEVELOPMENT OF A THEORY OF RISK MANAGEMENT, A PICTURE OF RISK PRACTICE AND A NEW TOOLKIT FOR ASSESSING RISK TYPE OF RESEARCH: MIXED METHODS RESEARCH. BACKGROUND & STRENGTH OF EVIDENCE: DESPITE EXCELLENT EFFORTS FROM IT IS SOMETIMES AN UNSAFE SYSTEM.

PATIENT AND PUBLIC INVOLVEMENT (PPI)
OPPORTUNITIES AT THE NIHR EVALUATION,
TRIALS AND (NETS) STUDIES PROGRAMMES
- MEMBER OF THE PUBLIC TO JOIN
THEIR PPI REFERENCE GROUP. THE
REFERENCE GROUP WORKS COLLECTIVELY
TO OPTIMISE THE INFLUENCE THAT
PATIENTS, CARERS AND MEMBERS OF THE
PUBLIC CAN HAVE.
